HKIA April cargo throughput marked robust increase

- Cargo throughput registered a year-on-year increase of 13.9% to 394,000 tonnes in April. Export again contributed most to this increase, growing by 24.7% compared to the same month last year. Among key trading regions, cargo traffic to and from North America, Europe and Taiwan recorded the largest increases during the month.
- For the first four months of the year, cargo volume rose by 17.7% year-on-year to more than 1.5 million tonnes.
- On a 12-month rolling basis, cargo throughput saw year-on-year increases of 11.0% to 4.6 million tonnes.
